

Bitrix Environment for Linux (RPM)

Installation Instructions

Install sequence:

```
# wget https://repo.bitrix.info/dnf/bitrix-env-9.sh  
# chmod +x bitrix-env-9.sh  
# ./bitrix-env-9.sh
```

Before or after installation, the Bitrix product must be allowed access to the following TCP ports in order to function properly:

```
80      http  
443     https  
8890    ntlm authentication  
8891    ntlm authentication via ssl  
8893    pull server (http)  
8894    pull server (https)
```
